PROFILE

Third-year cybersecurity engineering student, currently apprentice at Thales, seeking a **3-month internship in cybersecurity or software engineering between June and September 2027.** Experienced in Python development, security automation, computer networks, and Linux.

EXPERIENCE

Thales 2026 – Present

Cybersecurity Software Engineer Apprentice Cholet, France

- Develop and maintain Python-based tools for a cybersecurity test automation framework covering integration, verification, validation, and qualification of defense systems.
- Build automated test launchers and campaign analysis dashboards to assess security posture and detect regressions in critical embedded software.
- Collaborate with the IVVQ team to ensure security compliance, hardening, and qualification for embedded defense systems.

Anolix Jan. 2025 – Feb. 2025

Intern France

- Penetration testing: Conducted two internal web penetration tests, identifying initial vulnerabilities.
- Inventory management: Excel and Sage ERP suite.
- Designed flowcharts for logistics processes.

EDUCATION

ESAIP – School of Engineering 2024 – 2029

Engineering Degree (M.Eng. equivalent) – Cybersecurity & Networks Angers, France

- School ambassador at student fairs, career guidance forums, and open days.

UC Berkeley 2026

Summer Session Berkeley, CA

- Completed CS 161 (Computer Security) and CS 61A.

PROJECTS

Secure File Sharing System | *CS 161 – UC Berkeley*

- Designed and implemented an end-to-end encrypted file storage and sharing system in Go as part of UC Berkeley's Computer Security course (CS 161).
- Engineered secure user authentication, confidential file storage on an untrusted server, and cryptographic access control for file sharing and revocation.

CERTIFICATIONS & AWARDS

CompTIA Security+ | *CompTIA*

Gold Medal – Lépine Junior Competition | *Concours Lépine*

- Winner with Gaspard Lorilleux for the invention of the Autorideau, an automatically opening curtain rod system combining practicality and innovation.

TECHNICAL SKILLS

Cybersecurity: Network security, penetration testing, security automation, incident response, IAM
Programming: Python, Go, Bash, Java, SQL, HTML/CSS, LaTeX
Tools & DevOps: Git, GitHub Actions, Docker, Linux, AWS
Languages: French (native), English (C1 – TOEIC 990/990)
