- Angers, France
- Driver's license
- 20 years old
- French

SKILLS

Cybersecurity

Network security
Identity & access management
Cloud security
Compliance & best practices

Programming

Python, Java, Bash
HTML, CSS, SQL
LaTeX, UML

Cloud & DevOps

AWS, GitHub Actions
Google Cloud Platform

Languages

French (native)
English (C1 – TOEIC 975/990)

Interests

Electric Guitar (10 years)
Chess
Motorsport

Strengths

Self-reliance
Teamwork
Adaptability

PROFILE

Third-year engineering student with one year of experience at Thales, passionate about cybersecurity, **seeking a 3-month internship abroad, from June to September**. I am interested in computer networks, programming, Linux, and cyber defence.

EXPERIENCE

CYBERSECURITY ENGINEER - Thales

2026–

- Apprenticeship contract (3 years).
- Development of software testing environments for security hardening.
- Participation in complex engineering projects.

INTERN - Anolix

01–02/2025

- Inventory management: Excel and Sage ERP suite.
- Penetration testing: Conducted two internal web penetration tests, identifying initial vulnerabilities.
- Designed flowcharts for logistics processes.

VOLUNTEER WORK - Terre de promesse

06/2022

- Built a wooden house for people in social reintegration.
- Collaborative woodworking using precision tools.

GOLD MEDAL – LÉPINE JUNIOR COMPETITION 2021

- Winner of the Lépine Jr 2021 Competition with Gaspard Lorilleux for the invention of the Autorideau, an automatically opening curtain rod system combining practicality and innovation.

CERTIFICATIONS

COMPTIA SECURITY+

- Mastery of core cybersecurity principles: network security, incident response and sensitive data protection.
- Ability to identify, analyse and mitigate threats and vulnerabilities in hybrid and cloud environments.

AWS FUNDAMENTALS

- EC2, S3, IAM, VPC and cloud security best practices.

EDUCATION

ESAIP - School of Engineering

2024–2029

- Cybersecurity and networks.
- School ambassador at student fairs, career guidance forums and open days.

UC BERKELEY - Summer Session

2026

- Completed COMPSCI 161 and COMPSCI 61A

PERSONAL PROJECTS

POWERAUDIT - Scanner

07/2025

- Offline Windows compliance and security scanner.

HASHLY - Hash cracking app

2025

- University project that automatically detects the hashing algorithm of a given hash, suggests an appropriate cracking method and generates a ready-to-use Hashcat command.

WEATHER BOT - Weather bot

10/2024

- Tech stack: Python, OpenWeatherMap API, Telegram API.
- Sends personalised weather forecasts to Discord.
- Handles time zones and automatic location detection.
